Education

University of Maryland, College Park, MD

Aug. 2023 - May 2027

B.S. Computer Science (Machine Learning Concentration) GPA: 3.5/4.0

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Systems, Machine Learning

Skills

Languages: TypeScript, Python, JavaScript, Java, SQL, Swift, Kotlin, C

Frameworks: React, React Native, Next.js, Node.js/Express, FastAPI/Pydantic, Spring Boot, SwiftUI

AI & Data: Agentic Systems, RAG, LLM Evaluation, PyTorch, LangChain, PostgreSQL (RLS/RPC), pgvector, FAISS, MySQL

Cloud & APIs: AWS, Azure, Supabase Edge Functions/Deno, Docker, REST, GraphQL, GitHub Actions, Mixpanel, PostHog, Linux/Unix

Professional Experience

Peptide AI, Founding Engineer

May 2026 - Aug. 2026

- Owned end-to-end product development across Swift/SwiftUI, TypeScript/Deno services, PostgreSQL, testing, and weekly releases as **1 of 2 engineers**, helping reach **14,000 downloads and 9 million store impressions across iOS and Android in 2 months**.
- Redesigned onboarding, tracking, dosing, subscriptions, and notification flows in a cross-platform Swift/SwiftUI codebase; automated customer feedback and win-back emails with retries, deduplication, and unsubscribe protection.
- Cut cached RAG response latency **approximately 70%, from 9 seconds to under 3 seconds on cache hits**, using hybrid dense/BM25 retrieval, reranking, streaming, and a privacy-scoped TypeScript/pgvector semantic cache.
- Built a human-in-the-loop Coach across **4 runtimes and 7 data triggers**, converting user, wearable, and lab data into **12 deterministic rules and measurable 14-day experiments**.
- Reduced evaluation false positives from **23.3% to 3.3%** and blocked **11/11 unsafe dosing prompts** after tests exposed 6/11 guardrail bypasses; added a **17-check statistical suite** and nightly monitoring.

Booz Allen Hamilton, Backend Engineer, App Dev Club

Jan. 2026 - May 2026

- Reduced redundant video-frame processing **to one-third** by designing a two-pass DCT/SSIM algorithm and serving an OpenCV/OCR extraction pipeline through FastAPI and Pydantic.

University of Maryland, Software Engineer, Smith Financial Wellness Team

Sep. 2025 - Dec. 2025

- Shipped a live Flask/React Native financial-planning application for a **5,000+ student audience** and built Python services executing **10,000 offline Monte Carlo trials** for personalized projections.

GBCS Group, Backend Engineer Intern (Remote)

Apr. 2025 - Aug. 2025

- Cut authentication API latency **approximately 85%, from 1,300 ms to 200 ms**, by profiling Node.js/Express services and database queries; deployed REST and GraphQL services on Azure for **200+ users** through CI/CD.

Garden For Wildlife, Machine Learning Intern (Remote)

Aug. 2024 - Aug. 2025

- Improved RAG answer accuracy and recall **approximately 35%** and cut latency **15%** by building automated evaluations over **5,000 production queries**, adding caching, and deploying FastAPI/Pydantic endpoints.

DocuGuardian, Full Stack Engineer Intern (Remote)

Dec. 2024 - Jul. 2025

- Built and stress-tested the MVP's core file-upload workflow across Java/Spring Boot/JPA APIs and React/TypeScript, making **160+ code contributions** and reviewing **30+ pull requests** to help pull delivery forward by several weeks.

Selected Projects

PanNote | Chrome MV3, TypeScript, Node.js, SSE, IndexedDB

Jul. 2026 - Present

- Built and shipped a Chrome extension that converts **90-minute Panopto lectures** into structured notes through a multi-agent GPT-4.1 Mini pipeline streamed over SSE, with credentials kept in-browser.

LegalLease | Python, FastAPI, PyTorch, FAISS, Docker, llama.cpp

Apr. 2026 - Present

- Reached **99.1% retrieval recall across 112 questions and 12 documents** with FAISS/BM25 retrieval; improved held-out QA accuracy from **about 35% to 55%** by fine-tuning Qwen2.5-3B on **961 pairs**.

Inspect Robots (Open Source) | Python, Robotics Evaluation, pytest

Aug. 2026 - Present

- Merged **PR #415**, promoting human operator-verdict normalization to a public API with snapshot and regression tests; designed and proposed a backward-compatible metrics layer for mean, standard error, and success rate across scene and epoch evaluations.

Schedule of Activities Extractor | Python, FastAPI, Multimodal LLMs

Sep. 2026

- Built a provenance-aware clinical-document pipeline that located **12/12 reference and 8/8 holdout pages**, recovered **31/31 and 37/37 assessments**, and maintained **28 no-API regression tests**.
